DAT OPTIC, INC. INTRODUCES THE FireWire 800/IEEE-1394b PCI CARD

Santa Ana, California-October 30, 2003—DAT Optic Inc. announces the availability of the highly anticipated 1394b PCI card.

FireWire 800/1394b bus features hot plug-ability, transfer rates up to 800 Mbps, support isochronous data transfers, and auto-bus configuration. It is the fastest inexpensive peripheral connection available in the market.

DAT Optic Inc., a renowned developer and manufacturer of Optical/Data storage and CD/DVD duplication products, introduces the newest addition to their innovative line of FireWire products, the 1394b PCI host adapter.

DAT Optic's FireWire 800/1394b PCI card comes equipped with FireWire 800/1394b driver, which supports 1394b in Windows98SE, ME, 2000 and XP operating systems.

With DAT Optic FireWire 800/1394b PCI, PC users can enjoy data transfer rate up to 800Mb/s between 1394b peripherals and a PC, or create an 800Mbps network among PC and MAC systems.

DAT Optic's FireWire 800/1394b PCI card is fully compatible with Mac OS:

- OS 10.2.4 or higher - 1394a and FireWire 800/1394b functions at full capacity
- OS 9.x or higher - 1394a

The FireWire 800/1394b PCI card is outfitted with a combination of 1394a and 1394b ports.

Three external ports - Two 9-pin 1394b and one 6-pin 1394a

One internal port – One 9-pin 1394b

One internal power connector – Up to 1.5Amp per port can be delivered.
