DAT OPTIC, INC. INTRODUCES THE DigiREC, A PORTABLE TV AND DIGITAL VIDEO RECORDER

Santa Ana, California-February 5, 2004—DAT Optic Inc. announces the availability of the highly anticipated DigiREC.

DigiREC is a powerful device that enables video and regular Television viewing from a notebook or desktop PC. Turn a notebook into a portable TV! The compact unit allows video capturing, viewing, and recording.

DAT Optic, Inc., a renowned developer and manufacturer of Optical/Data storage and CD/DVD duplication products, introduces the newest addition to their innovative product lines, the DigiREC. The DigiREC has a built-in mini TV tuner and 480 Mbps high speed USB 2.0 interface, which allows direct viewing of video or TV programs on a notebook or desktop PC.

DigiREC can be used to record video files or TV programs in DVD quality. With the bundled MPEG-1/ MPEG-2 Encode software, recording a favorite Video or TV program can be easily done. MPEG editor can be used to edit video files, which can then be burned into VCD, SVCD, DVD by using CD/DVD Maker

DigiREC can support Multiple video inputs, including S-Video, Composite Video, Coaxial/ Antenna TV connector. It is a DVD Quality TV/ Video recorder. It comes with software for Time-shift, video encoding and DVD/VCD video authoring. The remote control is functional, convenient and easy to operate. The best part is that DigiREC is powered by USB 2.0 bus power, so no battery or AC adapter required.
